

Quality Door Panels  
from the UK leading supplier

the Shire & City Door range

## Shire Door introduction

The Shire Door Panel range is brought to you by one of the industry's leaders. A reputation for high product quality has been gained from the use of only the best materials, coupled with state of the art manufacturing technology and superb service standards.

Total Quality is an ethos which has been actively developed within the company, achieved through team working and constant analysis of improving performance both in product and service.

Architecturally, the entrance door is a key feature in the overall appearance of the house and should be in-keeping with the existing aesthetic styling, especially in older properties. It must also give protection, keeping out unwanted visitors or the worst of the weather.

Choosing the right door is therefore very important, within the Shire Door Panel collection you will find the perfect options. There are eighteen door designs to suit all styles of houses, each incorporates choice of colour, glazing options, insulating core options as well as accessories.

## City Door introduction

The City Collection has been created by synthesizing the myriad of design and cultural influences emanating from the great European Cities.

Recognising that lifestyle in the city is often reflected in design and function; we believe that the City Collection has captured something of the true essence of each European City. The use of strong lead designs for those southern European cities whilst applying subtle glass choices for those cities in the North, typifies this.

Product quality and long-term performance remains the core competency of any successful product. We understand the significant differing performance characteristics required by our products in Europe, the dry heat in the South to the biting cold in the North. We have incorporated this knowledge into the product design, ensuring that the choice will meet expectations.

The City Collection consists of eleven styles of panels and one side panel and are available in the same wide range of colours, ancillaries, structures and glass options as have been incorporated within the Shire range.

## Standard Options

## Special Options

## Glass Designs

## Georgian Bar

## Notes

1. It is essential for safety and performance reasons that glass is correctly specified and installed. All glass is toughened to BS EN 12150 1.
2. Glass is also available in 6.4 laminated glass, low emissivity glass and also 'Bronze Anti-sun'.
3. Natural leads will oxidise during their lifetime.
4. The resin bevels contained within the expressions range may occasionally show slight imperfections due to the manufacturing process.

## Notes

1. All door skins can be classified as flame retardant material under group B1, in accordance to DIN4102 Part 1.
2. Core foam materials are HCFC free and contain a fire retardant additive.
3. Due to limitations of the print process all photographs are considered to be only a representation of the actual product.
4. Due to a policy of continuous development, we reserve the right to change any of the patterns or designs without prior notice.
